ABOUT ME

Actuarial data science student skilled in analytics, machine learning, and modeling. I enjoy turning complex data into simple, useful insights and working through problems in a clear, organized way. I've gained hands-on experience through projects that blend ML, automation, and teamwork. Looking for chances to support strong risk and data-focused work while growing my technical skills.

PROJECTS

Cyber Risk Insurance – Data-Driven Risk Assessment & Dynamic Pricing Model 2025

Built a conceptual framework for dynamic cyber insurance pricing, focusing on premium estimation. Structured assumptions for revenue and premium computation, handled outliers for stability, and positioned the model for risk-based premium justification and proactive risk management. [Slides]

AUTOMATIC TIMETABLE GENERATOR WITH PREFERENCES 2023-24

Designed and developed a system to automate school timetable creation, generating conflict-free schedules by enforcing hard constraints (e.g., teacher availability, room/time clashes) and optimizing soft constraints (e.g., preferred time slots) using heuristic and optimization logic.

BHAJAN PLANNER WEB APP 2026

Link: brnbhajangroupplanner
Tech: HTML, CSS, JavaScript, IndexedDB
Built a web app to manage and search bhajans with filters and tracking features
Implemented offline storage using IndexedDB
Designed responsive UI with real-time search and suggestions
Developed admin features to add, edit, and manage records

PREDICTIVE MAINTENANCE – NASA CMAPSS (RUL PREDICTION) 2026

Link: github-CMAPSS-predictive-maintenance
Built a pipeline to predict turbofan engine RUL using CMAPSS data. Developed models for regression and classification, worked with multivariate time-series across varying conditions, and handled multi-condition and multi-fault sets. Focused on feature creation, RMSE-based checks, and spotting issues like leakage and weak generalization.

KEY ACADEMIC & CO-CURRICULAR EXPOSURE

CAS Student Program, Casualty Actuarial Society

Participated in the independent four-week CAS Summer Program 2025, Worked on a case-study based on insurance

Student Lead [HOSTEL Maintenance team]

Sri Sathya Sai Institute of Higher Learning - Present [co-curricular]

Student member and Lead [Cooperative Stores]

Sri Sathya Sai Higher Secondary School - 2023-24 [co-curricular]

EDUCATION

BACHELOR OF SCIENCE IN ACTUARIAL DATA SCIENCE *2024-2027 [Expected]*

SRI SATHYA SAI INSTITUTE OF HIGHER LEARNING

- Areas Explored : Probability and Statistics, Financial Mathematics, Introduction to Insurance Fundamentals, Machine Learning
- CGPA : 8.1 /10

FORMAL EDUCATION *2012-2024*

SRI SATHYA SAI HIGHER SECONDARY SCHOOL

- 11th & 12th Grade (Mathematics, Computer Science, Accountancy, Economics)
- 1st - 10th GRADE.

SKILLS

Data & Actuarial
Data Analysis, Statistical Modelling, Risk Assessment, Financial Mathematics, Probability & Statistics.

Programming & Tools
Python, R, SQL, PySpark, NumPy, Pandas, scikit-learn, Qt5, HTML5, Git, Excel, Full-Stack Development, Generative AI, Prompt Engineering.

Analytics & Machine Learning
Machine Learning, Predictive Analytics, Data Visualisation, Data Science.

Professional & Organisational
Communication, Leadership, Collaboration, Problem Solving, Project Coordination.

CERTIFICATES & LICENSES

- **ACET**, Institute of Actuaries of India (May 2024)
- **CAS Student Program**, Casualty Actuarial Society
- **Introduction to Python**, DataCamp (February 2026)
- **Introduction to SQL**, DataCamp (February 2026)
- **Artificial Intelligence Fundamentals**, IBM

LANGUAGES

- English: Proficient
- Hindi: Intermediate
- Telugu: Native
