## ABOUT ME

Results-driven **Actuarial Data Science** student with strong expertise in data analytics, machine learning, and quantitative modeling. Skilled in transforming complex datasets into actionable insights using structured analytical methods, statistical reasoning, and data-driven decision frameworks.

Experienced in applying data science techniques, automation, and ML concepts through academic and project work to solve real-world problems efficiently. Recognized for strong organization, analytical thinking, and the ability to communicate technical findings clearly within collaborative environments.

Seeking opportunities to contribute to impactful projects at the intersection of actuarial science, machine learning, and risk analytics while continuously advancing technical and professional capabilities.

## EDUCATION

**BACHELOR OF SCIENCE IN ACTUARIAL DATA SCIENCE** *2024-2027* [Expected]

*Sri Sathya Sai Institute of Higher Learning (SSSIHL),*

- Areas Explored : Probability and Statistics, Financial Mathematics, Introduction to Insurance Fundamentals
- CGPA : 8.1 /10

**FORMAL EDUCATION** *2012-2024*

*Sri Sathya Sai Higher Secondary School*

- 11th & 12th Grade (Mathematics, Computer Science, Accountancy, Economics)
- 1st - 10th GRADE.

## PROJECTS

**CYBER RISK INSURANCE – DATA-DRIVEN RISK ASSESSMENT & DYNAMIC PRICING MODEL** 2025

Built a conceptual framework for dynamic cyber insurance pricing, focusing on premium estimation. Structured assumptions for revenue and premium computation, handled outliers for stability, and positioned the model for risk-based premium justification and proactive risk management. [Slides]

**AUTOMATIC TIMETABLE GENERATOR WITH PREFERENCES** 2023-24

Designed and developed a system to automate school timetable creation, generating conflict-free schedules by enforcing hard constraints (e.g., teacher availability, room/time clashes) and optimizing soft constraints (e.g., preferred time slots) using heuristic and optimization logic.

## KEY ACADEMIC & CO-CURRICULAR EXPOSURE

**CAS Student Program, Casualty Actuarial Society**

- Participated in the independent four-week CAS Summer Program 2025,
- Worked on a case-study based on insurance

**Student Lead [HOSTEL Maintenance team]**

- Sri Sathya Sai Institute of Higher Learning - Present [co-curricular]

**Student member and Lead [Sooperative Stores]**

- Sri Sathya Sai Higher Secondary School - 2023-24 [co-curricular]

## SKILLS

**Data & Actuarial**
Data Analysis, Statistical Modelling, Cyber Risk Insurance, Dynamic Pricing Models, Risk Assessment

**Programming & Tools**
Python, SQL, MySQL, Pandas, skit-learn, Qt5, R, Microsoft Suite.

**Analytics & Machine Learning**
Data visualisation, Machine Learning (Basics)

**Professional & organisational**
Communication, Team Collaboration & Leadership, Analytical Thinking, Problem Solving, Time Management, Project Coordination, Event Management .

## CERTIFICATES & LICENSES

- **ACET**, Institute of Actuaries of India (May 2024)
- **CAS Student Program**, Casualty Actuarial Society
- **Introduction to Python**, DataCamp (February 2026)
- **Introduction to SQL**, DataCamp (February 2026)
- **Artificial Intelligence Fundamentals**, IBM

## LANGUAGES

- English: Proficient
- Hindi: Intermediate
- Telugu: Native
